Drawbox

This program is an extension of drawline, diagonal line, and the original drawbox. This program should draw a solid box on the screen. The user should be able to select the symbol, box width, box height, and box location on the screen. A sample output for this program is:

Please enter box width: 5
Please enter border char: %
Please enter box height: 8
Please enter box x coordinate: 10
Please enter box y coordinate: 1
